## Measurement of US Men's Olympic Trials Marathon Course Birmingham, Alabama August 15-17, 2003

The course of the US Men's Olympic Trials marathon course was pre-validated in August by a team from the extremes of the US and Canada. Organized by Doug Loeffler of Florida, and Rick Melanson of Birmingham, it attracted Al Dausman, who flew in from the state of Washington for the chance to measure an Olympic Trials course. Laurent Lacroix, from Winnipeg, Manitoba, made a driving Odyssey. He came east and picked up Bernie Conway in London, Ontario, then swung south and collected Mike Wickiser in Akron and Pete Riegel in Columbus.

Mike Wickiser had a dandy point-and-shoot digital thermometer

This group of four was the first to arrive, and they went directly to the start, did some scouting, and laid out a 300 metre calibration course very close to the start.

The group then went to the Tutwiler Hotel and checked in. That evening the rest of the team arrived. Tennessee certifier Dave Rogers drove in with Carla, his wife. Doug Loeffler flew in from Florida. And Rick Melanson, who measured the course, was there. Doug passed out yellow shirts to be worn during the ride.

Next day, Saturday, the group laid out a calibration course on $6^{\text {th }}$ Street, close to the finish. Now we were all set for an uninterrupted calibration-to-start-to-finish-to-calibration ride. The rest of the day was spent in touring the course and on individual pursuits.

Sunday at 7 AM everybody left the Tutwiler for the start line. We arrived at the calibration course at 7:30 and everybody got calibrated. Doug Loeffler collected all the calibration data. When the police escort showed up at 8:30, as agreed, we lined up behind Rick Melanson, who was our guide, and took off.

The team ready to start the course ride
We were met at each 5 mile split by Doug, who, with Carla Rogers and Jack Karn, was collecting data.

Upon reaching the finish line, we let Doug get the data and then went to $6^{\text {th }}$ street, a few blocks away, to recalibrate. Then Pete, Doug and Mike went to Mike's room to enter the data into Mike's laptop. Pete had prepared a calculation program beforehand, and it correctly calculated the results.

Results were pleasing, as they showed that the course had passed its validation, and the adjustments needed to bring it up to the full nominal-plus-SCPF were minor.

Team after data-taking at mile 15
Pete Riegel had brought along a "London Marathon 2003 Staff" jacket, and had announced at dinner that it would be awarded to the rider with the median measurement. This turned out to be Bernie Conway.

With calculations done, all were given a floppy disc with the data and rough calculations, and the various groups dispersed and went home.
...........Pete Riegel

## Prevalidation of Course Modification U. S. Men's Olympic Trials Marathon Course

On August 17, 2003, a group of seven riders prevalidated the course of the U. S. Men's Olympic Trials Marathon, originally certified as AL 02017 JD. Required adjustments were made to the course, resulting in certified splits at all 5 mile points and the finish. The resultant course was certified as AL 03001 DL.

Recently it was learned that the International Association of Athletics Federations (IAAF) intended to enforce its newly-inaugurated course standard to apply to those who qualify for the Olympics. The standard requires that a course have a drop of no greater than 1 metre per kilometre, and a straight-line separation between start and finish of no more than 50 percent of course length (the US limit is 30 percent).

The separation of the pre-validated course was within the limit, at 35 percent, but the elevation drop was excessive, at $1.9 \mathrm{~m} / \mathrm{km}$. It was decided to relocate the start to a lower elevation. Rick Melanson, the local course measurer, consulted with race management and found a new location, and established its position. The new start location resulted in the course being changed for its first 1.5 miles.

Pete Riegel, IAAF "A" measurer, was sent to Birmingham to pre-validate the altered course. Using the previously pre-validated position of the 5 mile split, the course was measured from the new start to the 5 mile point, and adjusted. The course was certified as AL 03050 PR.

Enclosed are:

1) New course certificate
2) Course map of AL 03050 PR
3) Course map of AL 02017 JD
4) Course map of AL 03001 DL
5) Calculations
6) USGS topographic maps of start and finish.

# Road Running Technical Council USA Track \& Field Measurement Certificate 

$\qquad$ Distance

## Be It Officially Noted That

Based on examination of data provided by the above named measurer, the course described above and in the map attached is hereby certified as reasonably accurate in measurement according to the standards adopted by the Road Running Technical Council. If any changes are made to the course, this certification becomes void, and the course must then be recertified.
Validation of Course - In the event a National Open Record is set on this course, or at the discretion of USA Track \& Field, a validation remeasurement may be required to be performed by a member of the Road Running Technical Council. If such a remeasurement shows the course to be short, then all pending records will be rejected and the course certification will be cancelled.

## This certification expires on December 31 in the year

Pete Riegel - Certifier, RRTC, USATF - 3354 Kirkham Road - Columbus, OH 43221-1368

| Rogers | 42172.85 |
| Melanson | 42200.50 |

In group measurements, the median measurement may be taken to lie close to the best value. Bernie Conway had the median measurement of 42171.42 metres.

In order to bring the course to full length,
23.58 metres will be added to the course at the start.

## LOCATIONS OF SPLITS BY BERNIE CONWAY'S MEASUREMENT

Includes an addition of 23.58 metres at the start

## SUMMARY OF ADJUSTMENTS TO BE MADE TO THE COURSE

A positive value means the point must be moved forward, in the direction of running A negative value indicates the point must be moved back, opposite the direction of running.

|  | Adjust- <br> ment <br> Metres | Adjust- <br> ment <br> Feet |
| :--- | :---: | :---: |
| Start | -23.6 | -77 |
| split moves back |  |  |

| Mile 20 | 7.2 | 24 |
| split moves forward |  |  |
| Mile 25 | 11.6 | 38 |
| split moves forward |  |  |
| Finish | 0.0 | 0 |
| unchanged |  |  |

All of the adjustments were made. Then, to accommodate the needs of the chip timing equipment, all measured points were moved 23 feet toward the start The resultant course was certified as AL 03001 DL.

Because the elevation drop exceeded $1 \mathrm{~m} / \mathrm{km}$, it was decided to relocate the start line at a location at lower elevation. The following report documents the validation of that course.

## PREVALIDATION OF REVISED COURSE - NOVEMBER 9, 2003

The start was relocated to reduce total drop.

The first 5 miles were remeasured.
Rick Melanson did some preliminary rides, and determined a probable location for the revised start location.

All calculations use average constant and include 1.001 short course prevention factor.
Calibration was done on Willow Lane 300 m.
Precal-6:50 AM - dry, clear, 50F

## Measurements

|  |  | Pete Interval Counts | Pete Interval Metres |  | Rick Interval Counts | Rick Interval Metres |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Expansion joint, center of driveway to Roebuck YMCA | 14840 |  |  | 309088 |  |  |
| Wooden telephone pole, NW corner 65th St \& 1st Ave. N. | 109154 | 94314 | 8057.277 | 400746 | 91658 | 8059.834 |

## Agreement $=$ <br> 0.000317 OK

## Official distance =

8057.277 metres
5.00656 Miles

5 miles + 34.63507 feet $\quad$ (use 5 miles + 35 ft )

Intersection of 65th and 1st Ave N
The wooden telephone pole at the NW corner of 65th St and 1st Ave N is 3 feet east of the certified and validated location of the 5 mile split.

Therefore the measured distance to the 5 mile point becomes 5 miles plus 38 feet.
The final start location is thus 38 feet west of the expansion joint at the center of the driveway to Roebuck YMCA.

All other portions of the course remain unchanged from AL 03001 DL
